

General Consultant Pediatrician

Positions available: [Full time or part time, permanent or locum/temporary.](#)

Headwaters Health Care Centre is a community hospital located in Orangeville, Ontario, but serving a wider area of Dufferin, Caledon, and surrounding counties. Our small town offers great opportunities for outdoor recreation, many thriving shops and restaurants, and lots of small-town charm. We are conveniently located one hour from downtown Toronto.

As a pediatrician at Headwaters Health Care Centre, you would be joining our group of two existing full-time pediatricians, providing inpatient and outpatient care to infants and children. Our existing pediatricians are happy to offer mentorship or to supervise a Canadian-trained new graduate. We are a very collegial group who help one another professionally and in managing a healthy work-life balance.

The hospital-based component of this position entails managing the Level-1 nursery and the inpatient pediatrics ward, attending high risk deliveries, and offering consultations to the Emergency Room. Outpatient consultant work encompasses the full breadth of general pediatrics. We also offer a newborn clinic, an urgent consult clinic, as well as a diabetes program. There are additional opportunities to do regional satellite clinics.

Our hospital is well supported with William Osler Health System being only 30 minutes away and Sick Kids only 60 minutes away. The professional environment at Headwaters Health Care Centre is exceptionally welcoming and supportive.

There is generous compensation by an Alternate Payment Plan that entails a base salary, plus a percentage of billings, HOCC, pediatric stabilization funding and critical mass stipend.

Interested applicants are welcome to contact our Division Lead of Pediatrics, Dr. Rebecca Woolnough @rwoolnough@headwatershealth.ca
